

Vacancy Announcement (Re-advertisement)

Assistant Professor

Number of Position: 1

We are looking for an Assistant Professor to join our dynamic team at the BRAC James P Grant School of Public Health (BRAC JPGSPH) of BRAC University. This position is based at the Centre for Non-Communicable Diseases (CNCDN), one of the five research centres of excellence at BRAC JPGSPH. The aim of the CNCDN is to reduce mortality and morbidity related to non-communicable diseases (NCDs) and malnutrition in Bangladesh and Global South through prevention, treatment and control. CNCDN conducts research, provides training, develops guidelines and quality standards and performs evidence-based advocacy around NCDs and malnutrition. Research of CNCDN is aimed at identifying and testing evidence-based interventions in clinical and population settings, implementing health system research to optimise delivery of interventions, and conducting economic evaluation of novel and evidence-based interventions.

We are seeking a person interested in and passionate about teaching and research and has sufficient knowledge and skill of non-communicable diseases, epidemiology and implementation research.

To know more about BRAC JPGSPH, please visit our webpage: <https://bracjpgsph.org/>

Key responsibilities:

- Develop proposals for research projects which increase the knowledge, understanding, and discovery of new explanations, insights, concepts, and processes relevant to NCDs and nutrition as Principal Investigator' or 'Co-Investigator'
- Lead quantitative and qualitative research activities aimed at prevention and control of NCDs and malnutrition as Principal Investigator' or 'Co-Investigator'
- Conduct data analysis, prepare reports and present research findings to academic, research and programme audience
- Develop course materials, teach and evaluate students enrolled to the MPH, EMPH and other programmes
- Identify sources of funding for research and lead the process of application
- Oversee the use of research project budgets and other resources
- Lead and develop internal and external networks, and collaborative groups, always representing BRAC JPGSPH in a professional manner, including links with professional bodies, and research donors.
- Mentor junior researchers on quantitative and qualitative research methods
- Supervise MPH students for the thesis projects
- Develop and offer short courses in collaboration with the centre for professional skill development

Requirements:

- Ph.D. in a life science related topic from a highly reputed university with outstanding performance (for other degrees too) and international academic experience
- MBBS from a reputed medical school
- At least 3 years of quantitative research experience in NCDs
- At least 2 publications in peer-reviewed journals as 1st author
- Portfolio of high-quality and impactful scholarly work
- Experience in teaching and research
- Excellent organizational skills and professionalism
- Experience in writing grant proposal
